ABDELRAHMAN HAMED

CYBERSECURITY STUDENT & DEVELOPER

A university student developing practical skills and building personal projects across cybersecurity, software, web development, and networking.

01 ABOUT ME

I'm interested in the systems behind the screen: how they're built, how they communicate, and how they can be made more secure. Through ongoing study and hands-on personal projects, I'm developing a practical foundation in cybersecurity and software development. I value steady learning, careful problem-solving, and making ideas tangible. My goal is to keep building, testing, and improving while gaining experience.

02 TECHNICAL AREAS OF INTEREST

01

Cybersecurity

Learning about risk, system protection, and security-minded problem-solving.

02

Web development

Exploring the structure and interaction behind clear web experiences.

03

Desktop applications

Interested in practical software for everyday tasks.

04

Networking

Studying how devices connect and how traffic moves across networks.

TECHNOLOGY DETAILS ARE INCLUDED WHEN VERIFIED FROM PROJECT FILES.

SELECTED WORK

Learning by building.

Personal and learning projects described from the available project summaries and workspace files.

01 WEB DEVELOPMENT / SUPPLIED SUMMARY

Restaurant website

A restaurant website with menu browsing and a clear, straightforward user interface.

MENU BROWSING / WEB EXPERIENCE

02 DESKTOP APPLICATIONS / COMPLETED

MR MIX cashier system

An Arabic Electron desktop point-of-sale app for the menu, orders, inventory, sales, shifts, expenses, customer records, receipt printing, and JSON backup/restore.

ELECTRON / JAVASCRIPT / HTML + CSS / JSON

03 NETWORKING / LEARNING PROJECT

Networking lab

A learning lab covering VLANs, trunk links, inter-VLAN routing, DHCP, DNS, and router connectivity.

VLAN / ROUTING / DHCP / DNS

04 CYBERSECURITY / CODE IN WORKSPACE

Stream cipher exercise

An educational Python exercise with key scheduling, keystream generation, XOR-based encryption, and a round-trip demonstration. This is a learning exercise, not a production security tool.

PYTHON / CRYPTOGRAPHY CONCEPTS
